

They are like trees planted along the riverbank,
bearing fruit each season. Their leaves never
wither, and they prosper in all they do. **PSALM 1:3**

Well Child Policy

The following guidelines can help you make an informed decision when determining if you should bring your child to our nursery/children's program.

Parents, please adhere to these guidelines for the protection of all our children and leaders.

A well child has:

- No fever over 99.6 currently or for the last 24 hours
- No vomiting or diarrhea currently or for the last 24 hour
- No cold or runny nose with excessive or discolored drainage
- No Coughs associated with infection
- No Strep Throat
- No unexplained rashes
- No Head lice
- No skin infections, i.e., impetigo, boils, ringworm
- No eye infections
- No childhood diseases such as: chicken pox, mumps, measles, rubella, pertussis, croup, etc.

If a child **does** exhibit one of the above symptoms, we cannot accept the child into the nursery or children's program for that day.

If a child develops any of the above symptoms while in our care, parents will be contacted and asked that the child remain with the parent.

Thank you for your cooperation!
